Medical Mindbenders Fosters Career Paths

Healthcare has and continues to be a vastly growing field and professionals in this field are in high demand. However, student knowledge of careers in health is often limited to doctors or nursing. They are unaware of hundreds of other clinical and non-clinical health career options to consider after graduation.

In an effort to engage students into considering a future health career, Catskill Hudson Area Health Education Center (AHEC) created Medical Mind Benders, which is a collection of 14 engaging games and activities that combines classic, simple gaming with a creative “medical twist.” These games are designed to strengthen student word association, inter-personal workplace skills, cognitive memory and problem-solving skills, while introducing them to an extensive variety of health careers and familiarizing them with health terminology. Students gain valuable new insight to the various medical careers available to them while having fun.

Catskill Hudson AHEC, which is a non-profit whose mission is to address regional healthcare workforce shortages through education and collaborative community relationships to assist students, career seekers and health professionals.

For additional information on Catskill Hudson AHEC programs, please visit www.CHAHEC.org.
